

## 2020 Waste Management – Hierarchy

**Our vision is to be recognised for our positive commitment to providing the highest levels of protection, conservation and enhancement of the Environment**

Our Hierarchy aim is to reduce the amount of waste produced and to recover maximum value from wastes that are produced.

After re-cycling options have been exhausted, Ethical Construction Ltd aim to provide a Zero waste to landfill as all residual non-recyclable waste is recovered as Energy (with exception to hazardous waste such as Asbestos which has no other viable disposal solution).

Any Landfills/Waste collection providers are all licensed and registered with the required & recognised agencies.

***“We take our responsibility seriously to protect the natural Environment. To that end, the Environment is given paramount consideration in all of our business activities.”***

***Tracey Vasko – Director***
